# Index

## A

Absorbing clamp 158, 173  
Absorption loss 437, 521  
Accreditation 244, 492  
Aerospace standards 118  
Air discharge 214, 222  
Air termination network (lightning protection) 483  
Ambient signals 189  
Analogue circuits  
    balance 382  
    common mode rejection 381  
    decoupling 349  
    dynamic range 381  
    emissions 349  
    immunity 380  
    instability 349, 384  
    operating bandwidth 381  
Ancillary equipment 249  
ANSI C63.4 66  
Antenna mode coupling 271  
Antennas 149, 197  
    antenna factor 150, 517  
    balun 196  
    cable 187  
    calibration 186  
    gain 193, 517  
    polarization 152, 176, 187  
Apertures in shielded enclosures 439  
Arc suppression 432  
Artificial hand 158  
Artificial mains network 155  
Audio rectification 380  
Australian Regulatory Compliance Mark 68  
Automotive EMC Directive 106  
Automotive transients 221, 288  
Average detector 104, 146, 147, 176, 190

## B

Backplanes 340  
Backplate in cabinets 466  
Balanced circuits 382, 402  
Balun transformer 196  
Bandwidth 144, 190  
Basic standards 60  
Benign equipment 36  
Biconical antenna 150, 193, 197  
BiLog antenna 150, 197  
Bonding  
    cable trays and ducts 463  
    enclosures and structures 463  
    of PECs 475  
Braided screened cable 396  
Broadband emissions 144

Broadband over power lines 18  
Broadcast ambient signals 189  
BS 7671 458  
BSI EMC committee GEL 212 79  
BSMI (Taiwan) 71  
Build state for testing 247  
Bulk current injection 209

## C

Cabinet installation and maintenance 470  
Cable 387–406  
    adding ferrite sleeves 412  
    attenuation 151  
    balance 273  
    classification 472  
    coaxial 389  
    common mode impedance 408  
    connections 399  
    damping with absorber 159  
    enclosure penetrations 469  
    ferrite loaded 404  
    ground plane flexi 404  
    impedance at RF 283  
    layout and routing during testing 252  
    magnetic fields from 292  
    pigtail connection to screen 400  
    point of screen connection 328  
    radiated emissions 276  
    resonance 282  
    return currents 388  
    ribbon 403  
    routing in enclosures 466  
    screen at low frequencies 391  
    screen at RF 394  
    screen construction 396  
    screen cut-off frequency 391  
    screen grounding 392, 401  
    screening attenuation standards 398  
    segregation 472  
    Steel Wire Armoured 396  
    transfer impedance 397  
    twisted pair 402  
    UTP vs. STP 405  
Cable trays 463, 474  
CAD layout software 308, 503  
Calibration  
    antennas 186  
    ESD generator 213  
    RF measuring equipment 185  
Capacitance versus geometry 522  
Capacitive components 408  
Capacitive coupling 264, 352, 384  
Capacitive crosstalk 390
